

The Most Trusted Name in Cargo Security

PACKAGE TRACKING from BABACO

Overview

The BabacoGPS Package Tracker is a very small wireless package tracking device specifically designed to meet the demanding needs of shippers who need to be able to track high-dollar packages/cargo. Unlike other solutions, our product is specifically designed for tracking packages which require a small size, low cost device with long battery life.

While many GPS tracking systems determine their position solely using earth orbiting satellites, the Babaco Package Tracker combines cellular triangulation and autonomous GPS in to a single device. A server on the cellular network determines the location of the tracking unit using the exact coordinates of the towers with which the unit is communicating along with other device-provided location information and because the Babaco Package Tracker does not require a clear view of the sky, it can determine and transmit its position anywhere there is a cellular signal.

The Babaco Package Tracker is always on which means you can ping it to determine its location whenever the need arises. With the factory battery, the Babaco Package Tracker will last 7-15 days reporting every hour in a good cellular coverage zone. The Babaco Package Tracker can be viewed and configured via website or you can use our 24 hour monitoring center to request that a package be remotely monitored and or configured.

FEATURES & BENEFITS

- + Water-resistant rugged housing – works outside
- + No need for an external antenna
- + Easy to install and hide
- + Position accuracy:
- + Line of Sight: 15-30 feet
- + Cellular assisted: <60 ft. 95% of time
- + Over-the-air configurable from the website
- + Google Maps based website
- + Geo-fencing and Alerts
- + Can be configured to report continuously or on-demand
- + Additional mounting and battery options available for custom applications

SPECIFICATIONS

Size: Small battery: 3.25" x 1.5" x 0.75"
Large battery: 3.25" x 1.5" x 1.25"

Weight: Small battery: 3.1 oz 1.8 Ahr
Large battery: 4.6 oz 3.6 Ahr

Enclosure: Plastic, water-resistant.

Indicator: Tri-colored LED.

Vibration: Up to 500Hz random vibration. 1.25G rms.

Temperature
Operating: -20° to +60° C

Storage: -40° to +80° C

Humidity: <95% non-condensing.
