

TRUK LOK IV

The Most Trusted Name in Cargo Security™

The TRUK-LOK IV - BULLET-LOK® is the perfect solution for trucks or trailers with swing-out, barn or hinged doors. Do not rely on a vulnerable hinged-door lock handle with an easily shimmed padlock anymore!

The TRUK-LOK IV - BULLET-LOK® comes in two versions: Manual or Automatic.

Manual version - the bullet itself is not welded but rather attached to a 16" Chain allowing the versatility of swapping the bullet from truck to truck.

Automatic version - the bullet itself is permanently welded onto the existing truck handle so when the handle is pushed toward the door the bullet automatically locks.

Available for a variety of truck bodies including dry, insulated, or refrigerated.

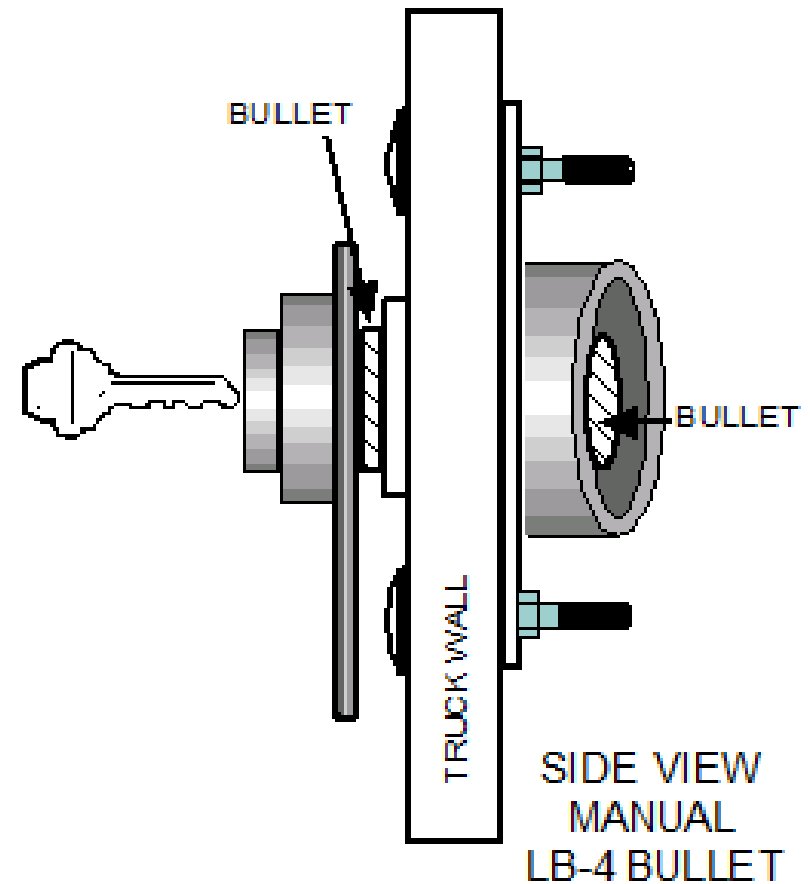

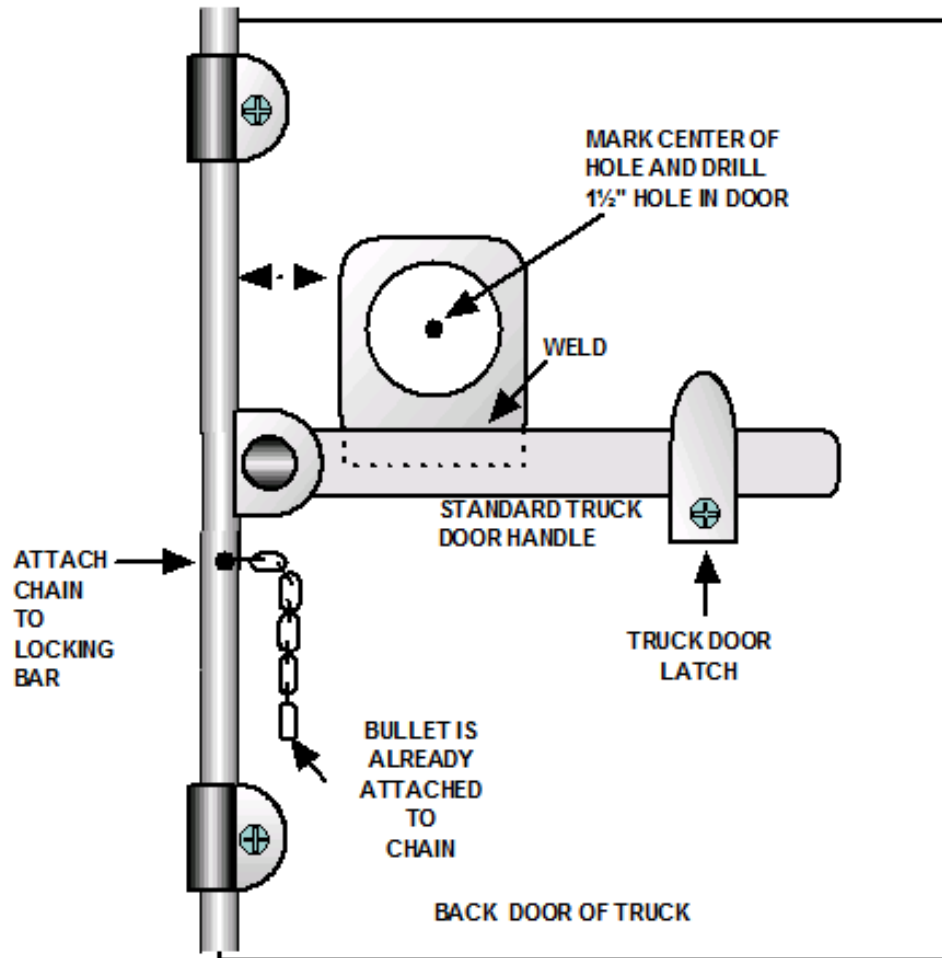

TRUK-LOK IV® Unique Features

- TRUK-LOK IV® - Eliminates the need for a padlock
- TRUK-LOK IV® - Cannot be LOST like a padlock
- TRUK-LOK IV® - Cannot be CUT like a padlock
- TRUK-LOK IV® - Cannot be STOLEN like a padlock
- TRUK-LOK IV® - Cannot be FORGOTTEN and locks every time

For Swing out Style Cargo Doors
