

BABACO®

Access Control on the Cloud

Access Control on the Cloud

A smartphone alternative to cards and fobs

The Tap2Open system provides a simple and elegant solution for entry into your access controlled entrances. Employees or vendors are enrolled by an invitation which is sent via text or email. No app download is required by the invited users. The invitation can be instantly revoked or modified. Our system also interfaces easily with any existing access control system.

Manage Anywhere

- Create and manage employees or guests from anywhere with an Internet tenabled computer or smartphone.

Detailed Access Logs

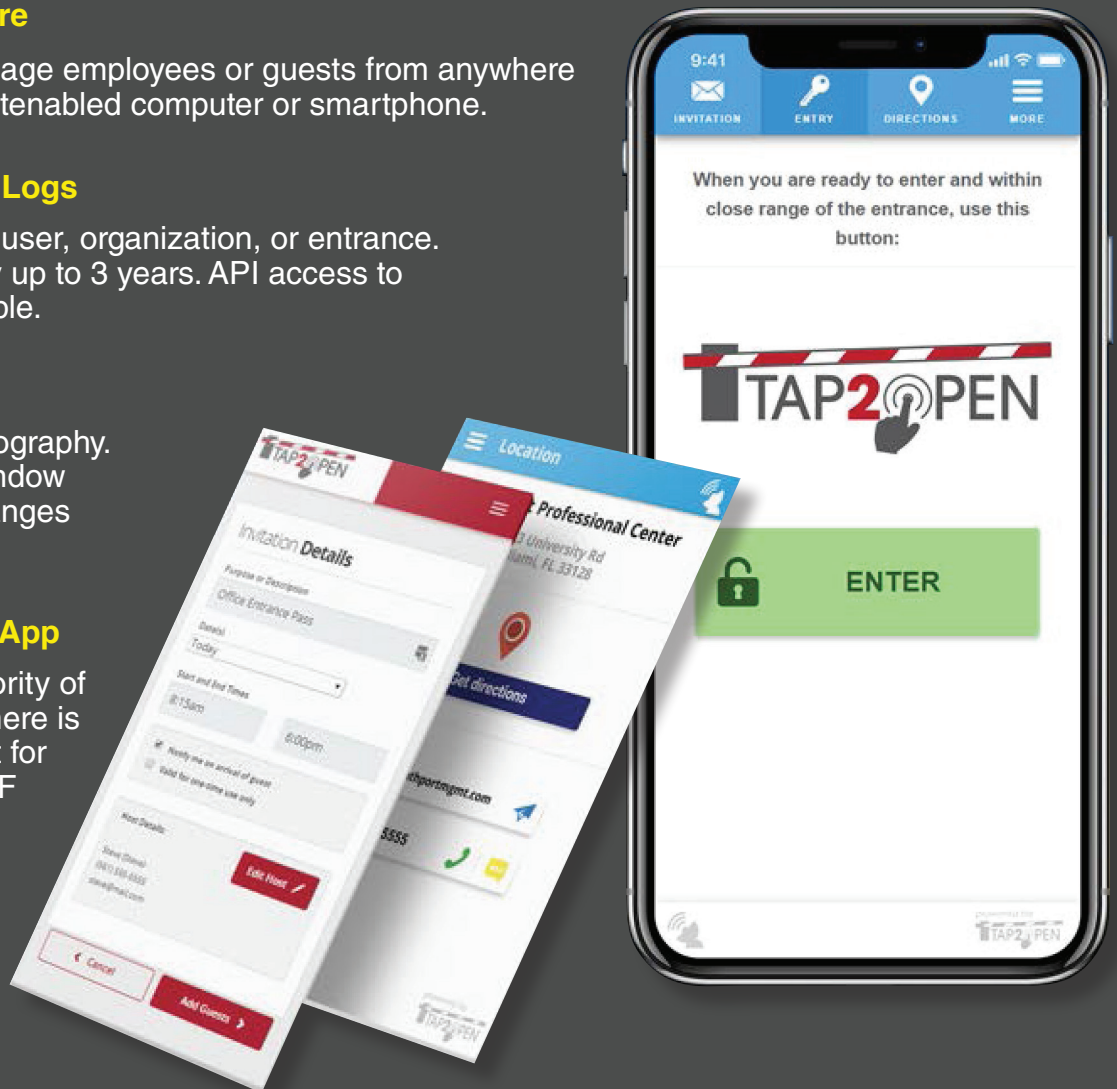

- View reports by user, organization, or entrance. See past history up to 3 years. API access to event log available.

Secure and Fast

- Advanced cryptography. Flexible time window restrictions. Changes instantly apply.

No Bluetooth or App

- Works with majority of smartphones, there is zero setup effort for users, and no RF range limitation.

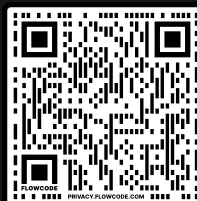

Every day we set out to prove our slogan to the world;

“The most trusted name in cargo security!”
